

**KazAgro/KazFarm 2011 – The most important agrarian event in Kazakhstan**  
26 – 28 October 2011 Exhibition Center KORME, Astana

**Kazakhstan is a top location for investments and trade in the agrarian area**  
**VDMA and DLG are the renowned supporters of the event**

The program of economic measures of the Kazakh government shows effect and the economy is on recreational course. Kazakhstan is the country with one of the biggest potentials under the CIS states and on account of the favourable situation a stepping stone for the East European and West-Chinese market. The country disposes of a very big potential in the area of Agriculture. Kazakhstan is one of the biggest grain producers worldwide, but disposes hardly of an own agricultural engineering industry. Moreover, there is a big need in animal husbandry and technology for the development of the meat and dairy industry in the country.

With KazAgro and KazFarm IFWexpo Heidelberg GmbH offers together with the Kazakh organizer ExpoGroup an efficient platform for the development of the business relations in the dynamically developing agricultural market in Kazakhstan.

The international specialised exhibitions KazAgro/KazFarm 2011 are supported by the both internationally prestigious organisations of agricultural engineering and agriculture, the German Engineering Federation (VDMA) and the German Agricultural Society (DLG e. V.).

A professional supporting program is guaranteed by the high competence of VDMA and DLG during the exhibition.

The Federal Ministry of Food, Agriculture and Consumer Protection (BMELV) will support the fair once more with an official German Pavilion.

**KazAgro – specialised exhibition for plant production and equipment**

At KazAgro agricultural machines and devices, equipment (seeds, fertilizer and plant protection products, lubricants and fuels etc.) for plant production will be presented as well as transport, processing and storage technology. Also special technology for fruit production and vegetable production is demonstrated as well as cultivation by speciality crops like wine, tobacco and cotton. Beside grain farming this area is very importantly for Kazakhstan.

**KazFarm specialised exhibition for animal husbandry and processing**

KazFarm encloses subject areas such as animal husbandry, stable construction and stable equipment, feeding technology, forage, veterinary medicine for cattle, pigs, sheep, horses as well as for poultry. Other areas include waste technology for processing in the keeping of animals and food industry, as well as plants, devices, ingredients, packaging for meat and dairy industry and marketing of animal products.

KazAgro/KazFarm will take place for the 2nd time in 2011, with the aspiration to become the most important agrarian event of Kazakhstan.

Last year more than 200 exhibitors from 13 countries took part at KazAgro/ KazFarm, on an area of more than 7,000 square metres their agricultural know how was shown. Among the participating companies also were agricultural engineering manufacturer and agricultural engineering trader.
